

STYLES | WOODS | FINISHES

GETTING STARTED

Begin by picking your door style. Next, choose your wood species or surface option. Then, make your finish selection. Lastly, add a specialty finish as available on your select style, species and finish combination.

Use this style guide for inspiration, but trust your Showplace designer to ensure the availability and finished result of the exact look and style combination you desire.

DOOR STYLES

Choose from a variety of styles including flat, raised, louvered, or beaded center panels, a variety of rail and stile widths and configurations, applied moldings, 3-piece styles, 5-piece styles, slab varieties, etc. You'll find that each door style offers a wide range of stains, paints and specialty finish options. Several of our best door styles are also offered in elegant inset versions with your choice of beaded or flush frame detail. To really appreciate the look and feel of these offerings, review actual samples with your Showplace dealer.

APPLIED MOLDING

Applied molding door styles have decorative molding accenting the perimeter of the center panel. The applied molding door style options available from Showplace come in various rail and stile widths, flat, flat reverse-raised solid center panels, and raised solid center panels.

Chateau shown in Rustic Hickory Natural

FLAT PANEL

The **flat panel** family of door styles contains a flat center panel. The flat panel options available from Showplace come in various rail and stile widths and flat and flat reverse-raised solid center panels.

Breckenridge shown in Red Oak Amber

BEADED PANEL

Beaded panel features evenly-spaced, vertical beading on the flat center panel.

Summit shown in White

KERF PANEL

Kerf panel styles feature evenly-spaced, shallow kerf cuts on the flat center panel.

Tucson shown in Rustic Hickory Thunder

LOUVERED

Louvered refers to a style featuring narrow slats, positioned horizontally at a slight angle, in a fixed, consistent interval, resembling window blinds or shutters.

Cabana shown in Cherry Thunder

MITERED

Mitered refers to how the rails and stiles of the door meet at the corners. Mitered joinery is at a 45-degree angle. The mitered options available from Showplace come in various rail and stile widths, flat, flat reverse-raised solid center panels and raised solid center panels.

Vercelli shown in Rustic Alder Rockport

RAISED PANEL

Raised panel door styles have a raised solid center panel. The raised panel options available from Showplace come in various rail and stile widths and various raised center panel styles and edge treatments.

Channing shown in Maple Rockport

SLAB

Slab doors use a highly-stable engineered wood core, faced with wood veneers, acrylics, foils or textures. This promises ongoing dimensional stability.

Vienna shown in Bamboo Natural

3-PIECE

3-piece construction consists of three components: two stiles (vertical components) and one center panel.

Villa shown in Textured Melamine Gibraltar

5-PIECE

5-piece construction is made up of five components: two stiles (vertical components), two rails (horizontal components), and one center panel.

Chalet shown in Textured Melamine Pelee Island Pear

WOODS AND SURFACES

After selecting the perfect door style for your home, your choice of wood species, or surface, and finish follows. Each hardwood species offers a wide range of stains, paints, and specialty finish options, shown on the following pages. In addition to standard and specialty wood species, we also offer a variety of slab, 3-piece, and 5-piece door styles offering their own distinct range of surface options including veneers, acrylics, foils, and textures, shown on pages 36 and 37.

CHERRY

The warm elegance of Cherry darkens considerably as it ages. Cherry's fine grain often exhibits swirls and a flowing, random pattern. Its color varies from nearly white to dark reddish brown.

Pendleton II shown in Cherry Chestnut

MAPLE

The fine, uniform grain pattern of Maple tends toward lighter colorations. Like all woods, it will darken with age. Maple takes on a subtle mottled appearance when finished in darker stains.

Hillcrest shown in Maple Natural

HICKORY

The outgoing extrovert of the hardwood family—dense, heavy Hickory displays vibrant grain patterns and wide variation in color. Lighter stains make this feature most evident, while darker stains tend to mute it.

Jackson shown in Hickory Sable

*Hickory is also available in Rustic in Showplace and Inset framed and EVO.

RIFT WHITE OAK

The riftsawn method produces a tightly-striped linear grain pattern with minimal interruption from perpendicular rays or flecks. Known for strength and stability. Celebrated for visual consistency and accepting a variety of finish treatments well.

Edgewater shown in Rift White Oak Buff

RUSTIC ALDER

Create an environment of authentic warmth and homey charm with Rustic Alder. Rustic Alder displays visible knots, mineral streaks, and color variation in the door frames and solid center panels.

Edgewater shown in Rustic Alder Montana

WALNUT

Walnut has a variable grain, ranging from straight to highly-figured, and color, ranging from tan to dark brown to purplish-gray heartwood, and creamy white to blonde sapwood. A darker stain is recommended when less color variation is desired.

Chesapeake shown in Walnut Sparrow

QUARTERSAWN WHITE OAK

The quartersawing method on White Oak yields material with distinctive grain and superior stability. Natural rays and flecks can be more prominent on Quartersawn White Oak running horizontally across the grain.

Pendleton shown in Quartersawn White Oak Sparrow

RED OAK

A time-honored favorite with prominent, distinctive grain character, Red Oak may show tiny rays and flowing patterns. It tends toward warm tones and is very hard with a high shock resistance.

Breckenridge shown in Red Oak Amber

SURFACES

Some door styles are offered in additional surface options like wood veneers, acrylics, foils, and textures. These options expand our offerings to provide a unique look and feel. Available in select EVO frameless door styles.

Chalet shown in Pelee Island Pear

PAINT GRADE

One of our most popular selections is Paint Grade. Choose any color from our standard paints or pick a custom color. Paint Grade doors and five-piece drawer headers have a solid, fine-grain hardwood frame. Center panels and slab headers are of HDM. The entire door is HDM in select door styles, if even greater stability is desired.

Lane shown in Westchester Gray

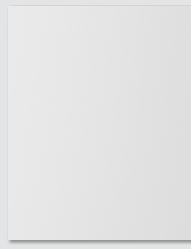

SURFACE OPTIONS

Some door styles are offered in additional surface options like wood veneers, acrylics, foils and textures. These options expand our offerings to provide a unique look and feel. To really appreciate the diversity of these offerings, review actual samples at your Showplace dealer.

FINISH IN STYLE

Our selection of stains, paints, and specialty finish options is extensive, providing unlimited customization opportunities. A quality finish is more than meets the eye. With Showplace, your finish selection offers superior durability.

Work with your Showplace designer to review samples and receive guidance.

STANDARD STAINS

Let the natural beauty of your cabinets shine through with one of our many stains, custom-formulated for Showplace Cabinetry. Available at no extra charge, standard Showplace stains highlight the unique charm of each wood species and keep your cabinetry looking fresh for years to come.

With Showplace, your stain choices range in variations of color from light to dark. Enjoy the natural variability of your selected wood species with our lightest options. Whereas, some of our darkest selections may naturally mute some of the hardwood variability, offering a rich, more uniform look. The choice is yours! And since exceptional stained finishes start with how the wood is prepared, our sanding processes blend precise state-of-the-art sanding equipment with the personal attention of hand-sanding for a quality finish you can rely on.

All finishes, stain and paint, are offered in your choice of satin or matte sheen.

Door Style: Pendleton | Species: **Quartersawn White Oak** | Finish: **Natural**
Designed by Brown and Glynn Construction in Milltown, NJ.

Door Style: Lexington Inset
Perimeter Species: **Rustic Alder** | Finish: **Montana**
Island/Accent Species: **Maple** | Finish: **Midnight**
Designed by Arrow Kitchens in Webster, NY.

Door Style: Sterling
Base/Accent Species: **Paint Grade** | Finish: **White**
Hood/Island/Wall Species: **Paint Grade** | Finish: **Black**
Designed by Roeser Home Remodeling in St. Louis, MO.

CHARACTER STAINS

Some stains mute variations in wood—the darker the stain, the more variation is hidden. Character stains provide a rich, semi-translucent look that accentuates the grain and variation found in natural wood. Try it with one of our Showplace specialty woods to make your eye-catching cabinetry all the more noticeable.

PAINTS

Showplace painted finishes give the impression of a solid-color surface. Our multi-step process includes a final topcoat with an oven-baked varnish for superior durability.

Paints can be accented with no-charge, hand-wiped glazing or hand distressing on non-slab styles. Paints can also be specified in the Vintage, Refined Vintage, Brushed Vintage, and Subtle Vintage finish packages.

BLACK, WHITE & GRAY SHADES

NEUTRAL SHADES

COLORS

Color representations are approximate. Please base selection decisions on actual samples.

SHOWPLACE COLORSELECT

The ColorSelect option gives you the ability to choose your exact hue from the Sherwin-Williams fan deck, with more than a thousand choices. This allows you to coordinate your cabinetry with other painted elements in the home. Talk to your Showplace dealer for full details.

ColorSelect CUSTOM

Have your heart set on a specific paint color from another paint brand? Not a problem with Showplace ColorSelect Custom. Create cabinetry in any paint color, from a suitable swatch or chip. Some limitations apply, so talk to your Showplace dealer about this special offering.

Door Style: **Lexington** | Species: **Paint Grade** | Finish: **ColorSelect Custom "Caldwell Green"**
Designed by Kitchens Plus in La Mesa, CA.

DISTRESSING

Showplace distressing gives an aged, timeworn look to cabinetry, reminiscent of antique furniture. The process creates soft corners and profiles, and subtle, randomly-placed dents. Optional glazing accentuates these features even more.

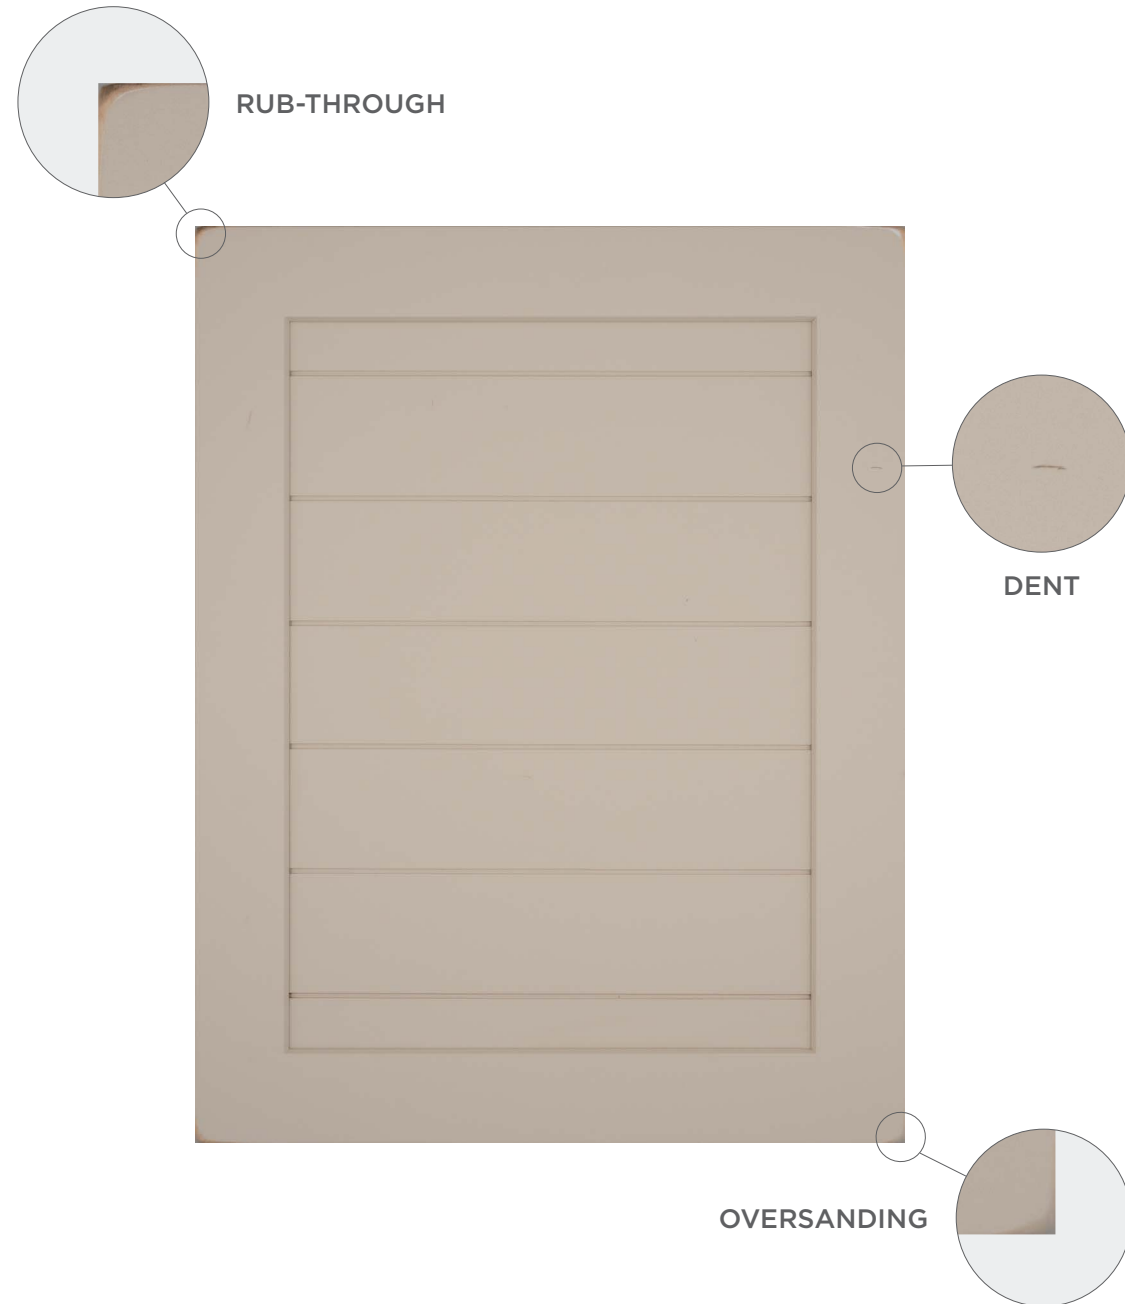

DISTRESSING OPTIONS

STAINED DOORS

- Dents
- Oversanding
- Dents & Oversanding

PAINTED DOORS

- Dents
- Oversanding
- Dents & Oversanding
- Rub-through & Oversanding
- Rub-through, Dents & Oversanding

HANDCRAFTED GLAZING

Glazing is an additional finish step in which a pigmented material is applied to the surfaces, then hand-wiped partially away. This allows the glazing to “hangup” in areas of detail, adding contrast and depth. Because of the handcrafted nature of glazing, it is naturally variable.

Showplace glazing is offered at no additional charge in these six tones. Glazing is available on most non-slab door styles, woods, stains and paints, in satin or matte sheen.

GLAZES

Color representations are approximate. Please base selection decisions on actual samples.

 Door Style: **Concord**
 Left Species: **Paint Grade** | Finish: **Soft Cream** | Glaze: **Walnut**
 Right Species: **Paint Grade** | Finish: **Teal Stencil** | Glaze: **Walnut**
 Designed by The Washington Kitchen Gallery in Ijamsville, MD.

WEATHERED

Weathered is a beautiful specialty finish that exudes natural weathered wood from sun, wind, rain and snow. Showplace's multi-step process strips graining and applies an accent color of your choice. With plenty of combinations, you're bound to find a weathered finish combination for your home that can fit any design style from traditional to contemporary.

 Perimeter Door Style: **Pierce** | Species: **Paint Grade** | Finish: **Light Mocha**
 Island Door Style: **Pierce Inset** | Species: **Rustic Hickory** | Finish: **Natural** | Specialty Finish: **Weathered Black**
 Designed by Cabinet En-Counter in Lebanon, NH.

WHY US?

At Showplace, we are just different than other cabinet manufacturers. We think it has something to do with our Midwestern values. Things like being kind, taking care of one another, work ethic, reliability and honesty.

WE CARE ABOUT WHAT WE CREATE.

WE CARE ABOUT THE IMPACT WE HAVE.

WE CARE ABOUT THE PEOPLE WHO WORK FOR US.

WE CARE ABOUT OUR CUSTOMERS AND THEIR EXPERIENCE.

MIDWESTERN VALUES

100% **EMPLOYEE** OWNED

In an industry full of consolidations and mergers, we're proud to say we answer to no one other than ourselves. Each cabinet is crafted with care by the very people who also own the company. And these very people are committed to being the best cabinet company in America. Our decisions are driven by us, for you, and best of all, not Wall Street.

MADE IN **AMERICA** SOUTH DAKOTA

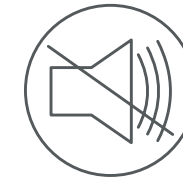

Our cabinets are 100% built in the USA, but it's more than where we build our cabinets, it's a mentality. We supply most of our components domestically. Virtually all of our dealers are small, locally-owned American businesses. We support fair trade through our industry association. And, we give back to American charities supporting people, animals and the environment. By buying Showplace, you're supporting American manufacturing and, ultimately, families.

LIMITED **LIFETIME** WARRANTY

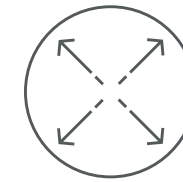

Consider our warranty a quality construction guarantee free of material defect, built to order specifications and in new condition like we'd expect in our own homes. Also, our framed cabinets are KCMA quality certified so you know they'll stand up to life in your home. See our full warranty on our website.

NOT-SO-STANDARD STANDARD FEATURES

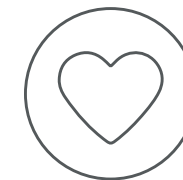

SOFT CLOSE

We partner with the best for our drawer glides and door hinges: Blum. No more banging and less wear and tear on your cabinets with standard soft-close doors and drawers.

MORE SPACE

We swear the things we all like to put in cabinets keep getting bigger. So, we made an industry-best 13" cabinet depth standard on all wall cabinets. This better accommodates larger plates and glassware, along with more spices and anything else. Also, top drawers have a standard 5-1/2" opening height so your ladles and other large utensils won't catch.

DESIGN FLEXIBILITY

If you can draw it, we can build it. Designers can use modifications to customize down to 1/16" while choosing from nearly endless door styles and finishes.

TRUSTED COMPONENTS

CERTIFICATIONS

OUR BRANDS

Showplace started in 2000 as a small semi-custom cabinetry brand producing 50 cabinets per day out of Harrisburg, SD. Today, we have around 1,000 dealers across the United States and make upwards of 800 cabinets per day. You can count on our 650+ employee-owners to produce quality cabinets across four different product lines.

Our flagship line started it all in 2000 and, to this day, is our most popular line. Cabinets are made of quality materials and provide plenty of options for customization. We consider this our most diverse product line, allowing you to make selections in line with your budget, big or small.

Meet the newest addition to our lineup, added in 2020. Featuring only our most popular finish options and limited customization, Longview is a great fit for simple kitchens, bathrooms and laundry rooms where custom designs aren't always needed. Longview provides the opportunity to get Showplace quality and the unique finishes and door styles you deserve, at a more affordable price point.

In 2016, we added EVO to our lineup. EVO is frameless cabinetry, also known as European-style cabinetry. Depending on your design preferences and, ultimately, the selections you make, EVO may be a more budget-friendly option than our flagship line. Contemporary styles are popular in EVO, but with our range of door styles and finish options, you can truly create any style from traditional to contemporary.

For over 10 years, we've been refreshing cabinets with our refacing line, Renew. Refacing is a great option for remodel projects when you plan to keep your existing layout and cabinet boxes, but are looking for an updated look and feel. Get new doors, hinges and veneers in Showplace door styles and finish options, including specialty finishes. Not all projects are a great fit for Renew, but when it works, you can expect a more budget-friendly option than all-new cabinetry.
