

EVO full-access cabinetry

[product overview](#)

employee-owned and
American made

Welcome to an overview of ShowplaceEVO full-access cabinetry for the home. Each ShowplaceEVO cabinet is crafted to your specification, right here in the heart of the American midwest. And since Showplace is an employee-owned brand, you know that everyone who works to bring your vision to reality cares about what they do. After all, each one is an owner. We hope you enjoy this look at our offering. We're all very proud of it.

So what do "cope and stick" and "mitered" mean?

There are several ways to make a cabinet door. The simplest is a slab style, which is pretty self-explanatory. We'll get to slabs later in this book. In this section, you'll find cope-and-stick styles and mitered styles. These terms refer to how the horizontal and vertical components meet at the corners. Cope-and-stick means a vertical joint. Look at the Channing door on the previous page. Mitered joinery is at a 45-degree angle, as in Danbury, above left. It's really just a question of personal preference. Which look do you like?

Lancaster

- red oak, maple, paint grade, cherry, rustic alder
- cope and stick construction
- shown in paint grade Oyster with Pewter glaze

So what does "SP" mean?

Many of our door styles are offered in "SP" versions, like Pendleton at right. "SP" stands for "solid panel." That's a flat-center-panel door with a reverse-raised solid hardwood center panel. Why would you want that? If you're doing a painted door, you might not want it, frankly. But if you are doing stained wood, the center panel of an SP door will take stain with the same coloration as the hardwood frame. A 1/4" veneered flat center panel will usually stain with a (subtle) visible difference from the frame, especially in darker stains.

Pendleton

- red oak, maple, paint grade, cherry, rustic alder
- cope and stick construction
- shown in red oak Driftwood

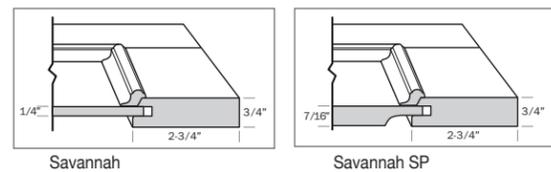

Pierce

- red oak, maple, paint grade, cherry, rustic alder
- cope and stick construction
- shown in paint grade Sandstone

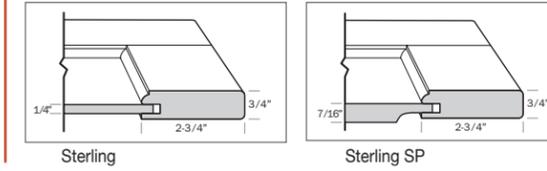

Savannah

- red oak, maple, paint grade, cherry, rustic alder
- cope and stick construction with applied molding
- shown in rustic alder Vintage Natural

Sterling

- red oak, maple, paint grade, cherry, rustic alder
- cope and stick construction
- shown in rustic alder Autumn

Vercelli

- maple, paint grade, cherry, rustic alder
- mitered construction
- shown in rustic alder Rockport gray wash

EVO drawer headers

Vercelli in Moderate White

Cope-and-stick door styles have a standard slab header, shown above. Five-piece headers are optional, as shown at right. Not available in slab styles.

When using five-piece headers with raised-panel door styles, like Cambridge shown at right, the center panel will vary. Standard-height drawers will have a flat center panel, as shown at the top. Taller drawer headers will have raised center panels, as shown in the lower two drawers on this three-drawer base configuration. Talk to your ShowplaceEVO designer for full details. Not available in slab styles.

Duet in high-gloss acrylic White

EVO slab doors

Slab door construction:
All woods naturally expand and contract in response to changes in environmental humidity. This can cause warping and binding, especially in the close tolerances inherent to full-access cabinetry. The ShowplaceEVO solid hardwood door styles on the previous pages resist warping due to the nature of their construction. The center panel is able to move within the frame in response to dimensional changes. But a slab door does not have this advantage. A solid hardwood slab door could expand, contract, bind or even warp over time. That's why the ShowplaceEVO slab doors use a highly-stable engineered wood core, faced with wood veneers, foils or textures. This ensures dimensional stability.

Milan

- red oak, maple, paint grade, cherry
- square corners and smooth edge profile
- shown in cherry Truffle

Novara

- red oak, maple, paint grade, cherry
- bevelled edge profile
- shown in maple Natural

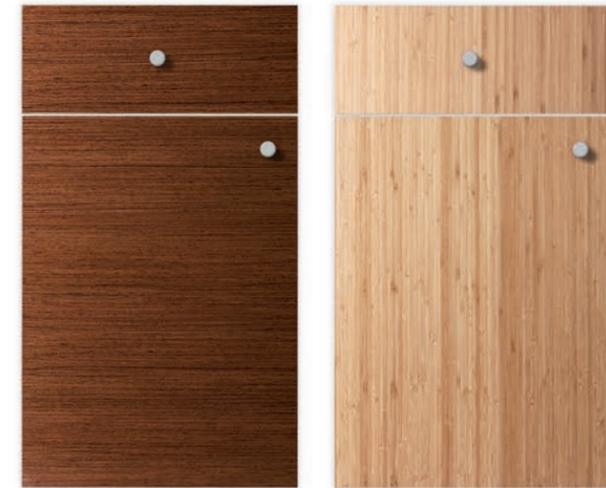

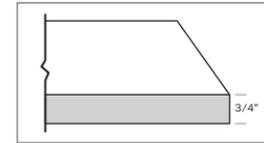

Duet

- foil, high-gloss
- 3D laminate slab door
- shown in White

Horizon, Vienna

- textures, wenge, bamboo
- red oak SG, maple SG, cherry SG
- Horizon: horizontal-grain doors and headers
- Vienna: vertical-grain doors and headers

EVO hardwood stains

red oak

cherry

maple

rustic alder

All of the woods and stains on this page are offered in your choice of satin or matte sheen. They can also be accented with specialty finish options like glazing and distressing. **Red Oak** has a prominent, distinctive grain character that may show tiny rays and flowing patterns. It is very hard with a high shock resistance. **Cherry** is a warm-toned wood that naturally darkens with age. It has a fine grain that often shows swirls and a flowing, random pattern. **Maple** has a fine, uniform grain and tends toward lighter colorations. Maple takes on a subtle mottled appearance when finished in darker stains. **Rustic alder** is a cherry-like wood with visible knots, mineral streaks, and color variation in the door frame and solid center panels.

glazes

Glazing is an additional finish step in which a pigmented material is applied to the surfaces, then hand-wiped partially away. This allows the glazing to “hangup” in areas of detail, adding visual contrast and depth. Glazing can be subtle or dramatic. It is offered at no additional charge in the six tones shown here, on all non-slab door styles, stains or paints.

rockport gray wash

peppercorn gray wash

Wash finishes are similar to glazes, but have a more uniform, all-over application. The result is a finish that suggests a subtle patina of aging. Offered on all of our standard wood species, gray washes accent either the midtoned Rockport stain, or the dark Peppercorn stain. Washes are offered at no additional charge.

distressing

Distressing gives an aged, timeworn look to cabinetry, reminiscent of antique furniture. The distressing process creates soft corners and profiles, and subtle, randomly-placed dents. Optional glazing accentuates these features even more. Select **oversanding, chain distressing, or both**. Distressed paint finishes can also display optional **rub-through**. An even higher level of aged character is available with the ShowplaceEVO Vintage finish options, shown above and on the next page.

ShowplaceEVO painted finishes:
Solid paints are available on all non-slab door styles, and on Milan and Novara slab styles. Paints can be accented with glazing or distressing on non-slab styles. Paints can also be specified in the Vintage, Brushed Vintage and Casual Vintage finish packages. Standard paints and Vintage paints are offered on rustic alder and paint grade. Black is offered on red oak, cherry and paint grade. Charcoal is offered on red oak and cherry.

rustic alder Brushed Vintage Light Mocha with Walnut accents

EVO vintage

The ShowplaceEVO Vintage offering takes **antique character to the highest level**. Special Vintage finish techniques include hand padding and dry brushing to create the impression of elegant aging. Optional Vintage **character elements** use chain distressing with a proprietary technique, worm holing and worm tracking, chisel and rasp distressing, and oversanding. This handcrafted finish is offered in three variations, some without distressing, in both stains and paints. Vintage finishes are offered on **non-slab door styles only**, in your choice of satin or matte sheen. Since no printed image can do justice to these vibrant and distinctive finishes, we invite you to view actual samples at your ShowplaceEVO dealer.

vintage

- Multistep antiqued finish technique
- Walnut brushed accents with random dramatic variations
- Proprietary distressed character elements
- Satin or matte sheen furniture-quality topcoat
